

Job Ref. No. JLIL026

Position: IT Enterprise Architect

Jubilee Insurance was established in August 1937, as the first locally incorporated Insurance Company based in Mombasa. Jubilee Insurance has spread its sphere of influence throughout the region to become the largest Composite insurer in East Africa, handling Life, Pensions, General and Medical Insurance. Today, Jubilee is the number one insurer in East Africa with over 450,000 clients. Jubilee Insurance has a network of offices in Kenya, Uganda, Tanzania, Burundi and Mauritius. It is the only ISO certified insurance group listed on the three East Africa stock exchanges – The Nairobi Securities Exchange (NSE), Dar es Salaam Stock Exchange and Uganda Securities Exchange. Its regional offices are highly rated on leadership, quality and risk management and have been awarded an AA- in Kenya and Uganda, and an A+ in Tanzania. We currently have an exciting career opportunity for **IT Enterprise Architect** within the **IT Department**. The position holder will report to the **Group Chief Information Officer** and will be based at Head Office in Nairobi.

Role Purpose

The role holder will be responsible for unifying and coordinating departmental processes across the company. The main goals of the role holder will be to create a map or blueprint of the structure and operations of an organization. This blueprint should include information and a map of IT assets and business processes.

Main Responsibilities

1. Developing the Enterprise Architecture and coordinating Architecture Plans.
2. Coordinating all Enterprise Architecture activities, both locally and globally.
3. Assisting in aligning business and enterprise initiatives with the Enterprise Architecture.
4. Auditing compliance within the Enterprise Architecture standards.
5. Serving as an advisor to senior business management on business and information integration strategies.
6. Building a business-level system and executing architectural analysis daily.
7. Making sure that the appliance architecture team delivers the system solutions to the architect's business team.
8. Developing, improving, and managing the procedure of service design.
9. Plan, build and arrange standard business solutions as required.
10. Preparing and presenting a technical presentation, test plan, and lab reports for various solution areas.
11. Communicating with the business process teams to complete conversions and with the IT team to effectively implement the architectural solutions.
12. Working on consumer stipulations, analyzing their specifications, and conducting product recommendations.
13. Responsible for selecting suitable software and hardware integration.
14. Supporting organizations to transfer their physical infrastructure to the cloud.
15. Responsible for designing the cloud infrastructure as per the allocated budget.
16. Main role is eliminating data leakage. He/ She must calculate the general mistakes and application downtime.
17. Addressing the technical risks, problems, and ideas from time to time.
18. Responsible for monitoring the system regularly, ensuring the organization's goals are met.
