

Job Ref. No. **JLIL341**

Position: **Senior Integrations Engineer (2)**

Jubilee Insurance was established in August 1937, as the first locally incorporated Insurance Company based in Mombasa. Jubilee Insurance has spread its sphere of influence throughout the region to become the largest Composite Insurer in East Africa, handling Life, Pensions, Asset Management and Medical Insurance. Today, Jubilee is the number one insurer in East Africa with over 1.9 million clients. Jubilee Insurance has a network of offices in Kenya, Uganda, Tanzania, Burundi and Mauritius. It is the only ISO certified insurance group listed on the three East Africa stock exchanges – The Nairobi Securities Exchange (NSE), Dar es Salaam Stock Exchange and Uganda Securities Exchange. Its regional offices are highly rated on leadership, quality and risk management and have been awarded an AA- in Kenya and Uganda, and an A+ in Tanzania. We currently have an exciting career opportunity for **Senior Integrations Engineer** within **Jubilee Life Insurance Limited**. The position holder will report to the **Senior Manager – Integrations** and will be based at our Head Office in Nairobi.

Role Purpose

The Senior Integrations Engineer will lead the design, development, and implementation of enterprise integration solutions that connect critical business systems. This role focuses on building scalable, secure, and resilient integration architectures using cloud-native technologies, containerization, and DevSecOps practices.

Main Responsibilities

1. Strategy:

- Collaborate with stakeholders to align integration strategies with business objectives.
- Evaluate and adopt emerging technologies to enhance efficiency and competitiveness.
- Contribute to IT roadmaps and digital transformation initiatives.

2. Operational:

a) Integration Architecture & Design

- Design scalable, cloud-native integration solutions.
- Establish integration patterns, standards, and best practices.
- Develop event-driven architectures and APIs for seamless interoperability.
- Collaborate with solution architects to design integration solutions that balance functionality, performance, scalability, and security.

b) Development & Implementation

- Develop integration solutions using cloud platforms (AWS, Azure, GCP), containerization (Docker), orchestration tools (Kubernetes), and modern integration frameworks.
- Develop RESTful APIs, event-driven integrations, and microservices-based solutions.
- Create reusable integration components and connectors to accelerate development and ensure consistency

3. Corporate Governance:

- Ensure compliance with data privacy laws and industry regulations.
- Implement robust security measures for integration systems.
- Manage vendor relationships and service level agreements.
- Facilitate end-user training and promote policy adherence.

Key Competencies

- Strong architectural thinking with the ability to design scalable, resilient integration solutions.
- Excellent problem-solving skills and attention to detail.
- Ability to balance technical excellence with business requirements and constraints.
- Strong communication skills and ability to explain complex technical concepts to non-technical stakeholders.
- Self-motivated with the ability to work independently and as part of a team.
- 6. Continuous learner who stays current with emerging technologies and industry trends.

Qualifications

- BSc. Computer Science/Software Engineering/IT. A master's degree in technology or Business-related courses is an added advantage.
- Cloud certifications (AWS, Azure, or GCP).
- Kubernetes certifications (CKA, CKAD, or CKS).
- Relevant integration platform certifications.

Relevant Experience

- 5+ years of experience in designing, implementing, and managing mission critical integration systems in a highly digitized environment, with at least 3 years focusing on cloud native integrations.
- Demonstrated experience with containerization technologies (Docker) and orchestration platforms (Kubernetes).
- Proven experience implementing and maintaining CI/CD pipelines for integration components.
- Experience designing and implementing RESTful APIs and microservices architectures.
- Experience with cloud platforms (AWS, Azure, GCP) and their integration services.
- Track record of implementing DevSecOps practices in integration projects.
- Experience with monitoring and observability tools (Prometheus, Grafana, ELK, etc.).
- Experience with infrastructure-as-code and configuration management tools.
- Demonstrated ability to mentor junior developers and share knowledge effectively.
- Experience leading complex integration projects from conception to delivery.
